

Sprint #2 Report

HelpMeHelpYou

11/4/18

Actions to stop doing:

- The team should push code and comment on the code more frequently
 - Team members don't push code into Github as frequent as we should. This affects the team communication and cooperation between members. With this action can help team members better understand what other members have been working with and how to use different functions of the code.
- Stop going over time during meetings
 - We should keep the meetings concise so we can get through what task have to be done.

Actions to start doing:

- The team should write down the tasks needed to be done in Sprint 4.
 - The team has ideas of tasks needed to be completed in Sprint 4 but they have not been documented.
- The team should start putting together each individual piece of the website together to have a working prototype.
 - This will allow for the team to see any changes that need to be made in order to make improvements to existing areas of the website and to see if anything needs to be adjusted for Sprint 4.

We are in the way to combine the HTML with the web2py, and we keep working on it to improve its display. We are going to work on the chat room and user profile page for the next stage.

Actions to keep doing:

- The team should continue having extra meet-up times to work on the application and planning.
 - This makes individual work much more efficient as we will clearly know the group's plan.
- The team should continue starting and finishing meetings on time.
 - This allows the group to have better scrum practices and better punctuality.

- This allows for more time to work on the project itself rather than using extra time to discuss the completed actions of the sprint and plans for the application.

Work completed/not completed:

Completed for this Sprint:

- User Story 1, I want people to know more about me and my needs, so I want a profile that tells other users more about me.
 - Task 1: Allow the users to set up their resource list as they sign up with a new account.
- User Story 2, I want to display what resources I can provide.
 - Task 2: Allow the user to add their resources in the database.
 - Task 3: Be able to show their added resources on the website.
 - Task 4: Allow the user to delete their resources in the database.
 - Task 5: Be able to show their deleted resources on the website.
 - Task 6: Allow the user to edit their resources in the database.
 - Task 7: Be able to show their edited resources on the website.
- User Story 3, I want to be able to see other's resources.
 - Task 8: Pull from the database and see what resources other users have to provide.

Not Completed for this Sprint:

- User Story 4, I want to communicate and connect with other profiles.
 - Task 9: Create a chat room with the two users to discuss how to share the resources.

Work completion rate:

Sprint 1:

Total number of user stories completed: 3 user stories

Total number of estimated ideal work hours completed during the prior sprint: 10 hours

Total number of days during the prior sprint: 14 days

Average User Stories/Day: 0.21

Sprint 2:

Total number of user stories completed during the prior sprint: 3 user stories

Total number of estimated ideal work hours completed during the prior sprint: 15 hours

Total number of days during the prior sprint: 14 days

Average User Stories/Day: 0.21s
