### HelpMeHelpYou Release Plan - CMPS 115

High level goals:

Be able to have a

- profile that contains basic information about the user.
- responsive and interactive pool of resources.
- friend system
- Messaging system

Sprint 1:

- Set up Database (3)
  - As a developer, I want to be able to see the users signing up and be able to use this information through a database.
- Welcome Page (2)
  - As a user, I want to see the welcome page.
- Sign up page (5)
  - As a user, I want to be able to sign up to be able to have an account.
  - As a user, I want to be able to sign up to be able to have a profile, and to see my information organized on a profile page.
- Login page (3)
  - As a user, I want to be able to interact with the application by logging in.
- User Profile (2)
  - As a user I want people to know more about me and my needs, so I want a profile that tells other users more about me.
- View other people's resources (3)
  - As a user, I want to see what resources other profiles can provide me.
- Add, Delete, and Edit resources (8)
  - As a user, I want to be able to update my own resources, so I can better communicate my needs.

Sprint 2:

- Friend System and Groups (13)
  - As a user, I want to be able to have easy access to resources from people I know.

- As a user, I want to be able to share any resources with a group of people I know.
- Messaging system (8)
  - As a user, I want to communicate and connect with other profiles.

#### Sprint 3:

- Track resources (5)
  - As a user, I want to tell people when I have new resources and when I no longer have any resources.
- Location Tracking (8)
  - As a user, I want to be able to see resources from people near me.
- Add style for cleaner UI (5)
  - As a user, I want to intuitively interact with a responsive web application.

#### Backlog:

We probably won't have as much time to spend on refining the front end, so the design features in the project 'vision' are not likely to happen. Animations would have been cool, but it might not be feasible for this quarter. I still think we can attempt to design and brainstorm about it, but it isn't a necessary feature. That is all ok!
